

UL Classified for openings up to a 2.5" or 4" diameter

The FF160 Fire Protection Plug is made of a rapidly expanding intumescent foam. The flexible and lightweight material is ideal for **retrofitting installation**, as well as new construction of power and control cables, telecommunication cables, and optical fiber cables through solid floors or ceiling systems.

Key Benefits

- ⇒ Fire rated
- ⇒ Easy retroactive installation
- ⇒ Cost-effective
- ⇒ Easy installation
- ⇒ **Does not require any special tools**
- ⇒ For copper and aluminum conductor cables
- ⇒ For floor assemblies only one plug required
- ⇒ **UL Classified**
